

Streamline Your Finances with Astrata Accounting

Astrata Accounting empowers your finance, HR, and operations teams by centralizing essential financial tasks. With robust data visibility and seamless system connections, you can confidently navigate compliance requirements while focusing on business growth.

The Core of Your Financial Operations

For government contracting and professional services firms, managing complex financial workflows requires precision, visibility, and uncompromised security. The Astrata Accounting application is the core of the Astrata platform, delivering powerful tools designed to automate tasks, eliminate manual entry, and ensure audit-ready compliance.

By integrating directly with your ERP system, Astrata Accounting reduces IT overhead and transforms disconnected data into real-time insights.

ASTRATA ACCOUNTING MODULES

Bank Transactions

Connect your bank to Astrata and effortlessly route daily transactions—from deposits and AP voucher matching to payroll entries—all within a secure, centralized interface.

Employee Actions

Automate employee data and assignment changes through a secure, multi-level approval process—tracking status updates, address changes, workforce assignments, and labor categories with full history logging.

AP Automation

Astrata's AI reads your invoices, completes AP entries with full project coding, and routes finished vouchers directly to Costpoint for fast, secure approvals—so your team can add vendors in bulk and close the books with confidence.

Credit Card Management

Sync your credit cards to Astrata for real-time transaction monitoring, seamless routing to Deltek or Accounts Payable, and automatic employee charge matching—eliminating hours of manual reconciliation.

Prepaid Expense Management

Schedule and automate your prepaid expenses from a single screen—complete with detailed journal descriptions and reporting schedules—so your books stay accurate, visible, and audit-ready at all times.

Mobile Barcode Processing*

Install the Astrata mobile app to scan barcodes and complete Purchase Order Receipts, Manufacturing Order Issues, Sales Order Issues, and Physical Inventory Counts in real time.

*Barcoding module not in standard Astrata Accounting package
