

The Future of GovCon ERP is in the Cloud

Discover why government contractors are moving from on-premise Costpoint to **Deltek Costpoint GovCon Cloud Moderate**

Government contractors are facing increased pressure to meet **Cybersecurity Maturity Model Certification (CMMC) Level 2** requirements and securely manage **Controlled Unclassified Information (CUI)**. Non-compliant systems can put future contract eligibility at risk.

Deltek Costpoint GovCon Cloud Moderate (GCCM) delivers a secure cloud platform built for GovCon organizations, strengthening security while reducing infrastructure management.

PCI, a Deltek Platinum Partner, has helped over 1,000 organizations successfully implement and optimize Costpoint. Our team works closely with government contractors to plan and execute secure, compliant transitions to GCCM, aligning each migration with business goals, compliance timelines, and long-term growth strategies.

Transform Your ERP From a System You Maintain Into a Platform That Continuously Delivers Value.

Challenges with on-premise

- Increasing compliance risk with evolving CMMC and DFARS requirements
- Manual processes and limited visibility across projects and financials
- High infrastructure costs for hardware, maintenance, and upgrades
- Delayed access to new capabilities due to upgrade cycles
- Limited ability to leverage AI and advanced analytics

Benefits of Costpoint GCCM

- Supports DFARS 7012 and CMMC compliance with FedRAMP Moderate Equivalency
- Real-time visibility and automation across financials and project operations
- Reduced IT burden with cloud-managed infrastructure and updates
- Continuous innovation with automatic access to the latest features
- AI-driven insights and automation to improve decision-making and performance

AI-Powered Advantage

Deltek's cloud platform delivers AI-driven insights that help identify risks, optimize resources, and surface opportunities—capabilities that are difficult or impossible to achieve in on-premise environments.

Future-Ready ERP for Government Contractors

Deltek Costpoint has long been the leading ERP solution for government contractors. GCCM extends that trusted platform into a secure cloud environment built for the evolving GovCon landscape.

- A unified, secure platform for financials, projects, and compliance data
- AI-powered insights and automation to improve decision-making and performance
- Continuous innovation with automatic updates, keeping you always current
- Scalable architecture designed to support growth and increasing complexity

Stay competitive while meeting the security and compliance demands of federal contracts.

300,000+

defense contractors impacted by CMMC requirements.¹

80%

of federal cloud authorizations are FedRAMP Moderate.²

30,000+

organizations rely on Deltek solutions worldwide.²

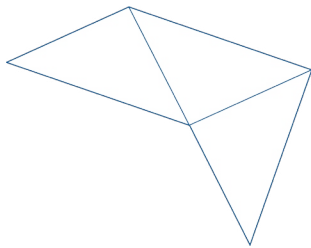

90%

of decision-makers are adopting cloud platforms.³

Planning Your Migration

A successful transition to the Cloud starts with a clear understanding of your current environment. A Phase 0 assessment helps evaluate infrastructure, identify barriers to cloud adoption, and build a business case through ROI and TCO analysis.

1

Plan around key milestones

Align your migration timeline with key milestones such as CMMC assessments to ensure you're fully transitioned before critical deadlines.

2

Drive early alignment

Prepare your teams for the change by sharing key details in advance, including new access points, login updates, and what to expect at go-live.

3

Confirm readiness

Validate system access, reporting, and integrations ahead of launch to ensure everything runs smoothly from day one.

The PCI Advantage

PCI combines deep Costpoint expertise with decades of experience supporting government contractors. Our team helps organizations plan and execute their move to GCCM with confidence, minimizing disruption while strengthening compliance and long-term performance. **Start Your Deltek Costpoint GCCM Journey.**
